## DETAILED ACTION

### ***Claim Rejections - 35 USC § 102***

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

2. Claims 10, 20 are rejected under 35 U.S.C. 102(e) as being anticipated by Lesher (US 6396759).

As to claims 10, 20, Lesher disclose (fig 1) a method for trimming a circuit of a packaged integrated circuit (IC) chip (140), wherein the packaged IC chip is provided with a magnetically configurable adjuster device for circuit trimming, the method comprising:

testing (101) the circuit of the packaged IC chip (140) to obtain a responsive output signal thereof, and

according to the response of the output signal, applying a magnetic field to trim the circuit (140) of the packaged IC chip (140) by Hall effect (120) so that a desired output signal is obtained.

***Allowable Subject Matter***

3. Claims 1 – 9 and 11 – 19 are allowed.

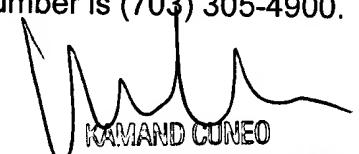

The prior arts of record do not disclose the combination of the structure including;

a signal processor and amplifier device that is connected to the Hall element, wherein the signal processor and amplifier device receives and amplifies the voltage signal from the Hall element; a  
a configurable adjuster that is connected to the decoder, wherein the configurable adjuster includes a plurality of circuit-trimming members and a plurality of electrically configurable elements which configurations can be modified by the decoded signals so as to accomplish a desired circuit trimming of the packaged IC chip via the circuit-trimming members.

***Conclusion***
